Project Coordinator: Prof. Nataliia Zaiets
Contact Persons BHT: Prof. Stefan Junge and Prof. Roland Kirchberger

Contact Persons

NUFT: Prof. Nataliia Lutska and Prof. Yaroslav Smitukh
NUBiP: Prof. Olena Hlazunova and Prof. Ihor Bolbot
KMONU: Prof. Oleksiy Chorniy and Prof. Olga Maslak

The project **aims to strengthen** academic cooperation and innovation in higher education between the **Berlin University of Applied Sciences (BHT)** and **Ukrainian partner universities**. Its goal is to develop **practice-oriented study programs, joint teaching formats**, and **sustainable research partnerships** in **Packaging, Automation, and IT**, thereby contributing to stronger academic networks, talent development, and the European integration of Ukrainian higher education.

Ukrainian and German students take part in joint digital and block courses with scholarships and mentoring support. Starting in 2025, **yearly mobility programs** will enable 30 Ukrainian students to complete internships at industrial companies in Germany and the EU. while 32 BHT students will join a program in Ukraine — online in 2025–2026 and on-site from 2027. These exchanges promote cross-cultural understanding, innovation, and strong academic partnerships between Germany and Ukraine.

The project further develops digital, linguistic, teamwork, teaching, and creative skills among students, PhD candidates, and teaching staff. To ensure lasting impact, **annual leadership meetings** and **online capacity-building programs** strengthen cooperation and enhance the digital and international management capacities of Ukrainian universities.

A **Double Degree Master's Program** between BHT and NUBiP is planned, with aligned curricula, mutual credit recognition, and a joint study pathway for students from both countries.

The project also promotes high-level academic exchange through a **structured PhD training program**, which includes regular research stays for doctoral candidates and visits by supervisors to ensure close research collaboration and knowledge transfer.

Main Activities in the Project

- Student mobility programs and study excursions; preparatory English courses.
- Double Master's Program BHT–NUBiP with credit recognition and aligned curricula.
- Joint English-taught courses in packaging, automation, and related fields with UA-DE students.
- PhD training with annual research stays of Ukrainian candidates at BHT.
- Annual leadership meetings of BHT, NUFT, NUBiP, and KMONU representatives.
- BHT-led webinars on higher education management and internationalization with Ukrainian partners.

partnering universities

**National University of Life and
Environmental Sciences of Ukraine (NUBiP)**

**National University of Food Technologies
(NUFT)**

**Kremenchuk Mykhailo Ostrohradskyi
National University (KMONU)**
